Making Communication Easier

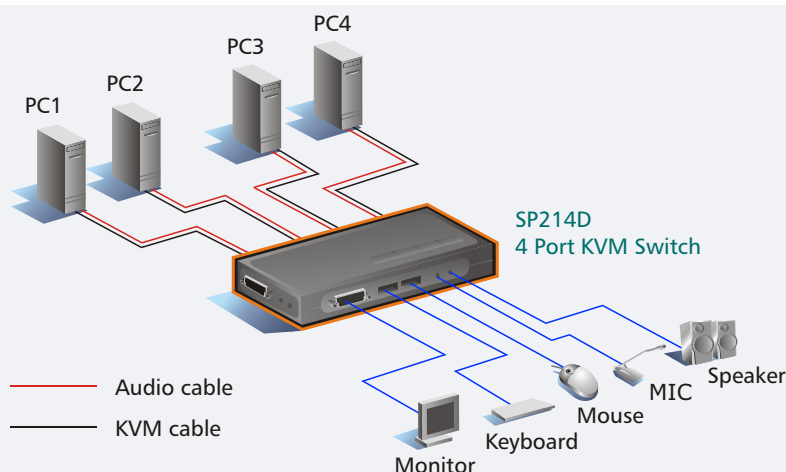

Micronet SP214D

4-port USB KVM Switch

Micronet SP214D 4-port KVM switch can share one set of keyboard, mouse, monitor and audio up to four workstations. It catches up the new technical trend to save the two PS/2 connectors and use one USB connector to set it up. From workstation, use the specified KVM cable to link PC's USB port to SP214D. The USB connection will be defined as keyboard and mouse. Furthermore, the audio can be switched with keyboard/mouse simultaneously or stay tune on the specified workstation. It is convenient for audio designer to switch audio channel or listen music for entertainment. SP214D provides the utility to define hot-key and auto-scan period, and shows the host number in the task bar. It provides you more convenient way to switch among the four workstations.

Key Features

- 4-port KVM Switch share one set of keyboard, mouse, monitor plus audio and Mic
- Channel selection by push button, keyboard hotkeys and Windows-based utility
- USB console support for USB keyboard and mouse
- Support universal and user definable hotkeys
