Making Communication Easier

Micronet SP212D

2-port USB KVM Switch

Micronet SP212D 2-port KVM switch can share one set of keyboard, mouse and monitor to two workstations. It catches up the new technical trend to save the two PS/2 connectors and use only one USB connector to set it up. From workstation, use the specified KVM cable to link PC's one USB port to SP212D. The USB connection will be defined as keyboard and mouse. Furthermore, SP212D provides the utility to define hot-key and auto-scan period, and shows the host number in the task bar. It provides you more convenient way to switch between the two workstations.

Key Features

- 2-port Slim Palmtop KVM Switch with 2 x detachable USB KVM combo cables
- USB console support for USB keyboard and mouse
- USB 1.1 Specification compliant
- Multi-platform support for PCs and Macintosh G3/G4 MAC, iMAC
- Hot-plugging PCs for maintenance without powering down the KVM Switch or PCs
- Windows-based utility
- Support universal and user definable hotkeys
- Channel selection by push button, keyboard hotkeys and Windows-based utility
- High VGA resolution 2048 x 1536

KVM Switch

SPECIFICATION AND PRODUCT FEATURES
